

JOIN THE CONE-BEAM CT PERFUSION EARLY ADOPTER PROGRAM

BE AMONG THE FIRST TO BRING
ADVANCED PERFUSION IMAGING
INTO YOUR ANGIO SUITE.

Are you an Interventional Neuroradiologist, Stroke Neurologist, or Neurosurgeon ready to pioneer the next Standard of Care?

CBCT Perfusion delivers CT-quality perfusion maps directly in the angio suite — enabling real-time tissue assessment and patient triage during thrombectomy, without disrupting your clinical workflow. **Limited spots available. Apply today!**

WHY BECOME AN EARLY ADOPTER?

A SELECT PROGRAM FOR INNOVATIVE CLINICIANS SHAPING THE FUTURE OF STROKE CARE.

- > **Early Phase Preferential Pricing:** Join during the early commercial phase and lock in exclusive pricing not available after general release.
- > **Multi-Center Research & Publications:** Participate in landmark multi-center studies, contribute clinical data, coauthor publications, and help establish clinical guidelines for CBCT perfusion imaging.
- > **Speak at the Cercare Medical Summit:** Present your clinical experience and establish yourself as a thought leader in the field.
- > **Become a Reference Center:** Be recognized as a Center of Excellence for CBCT Perfusion and attract international clinical peers.
- > **Shape Product Development & Get Priority Support:** Direct access to our team from day one — dedicated training, a direct line to our clinical specialists, and the opportunity to provide feedback and influence the clinical roadmap.

SIMPLE. IMMEDIATE. NON-DISRUPTIVE.

Simply acquire a contrast injection, and perfusion maps are ready for immediate patient triage on the spot

Siemens Integration: Syngo DynaCT Multiphase enables collateral status assessment with time-resolved DynaCT — up to 10 time points within ~60 seconds.

LIMITED SPOTS AVAILABLE — **APPLY NOW**

THIS EXCLUSIVE EARLY ADOPTER OFFER IS AVAILABLE UNTIL JUNE 30, 2026.

Designed for forward-thinking clinicians ready to redefine acute stroke care.
Contact your local Cercare Medical representative to apply.
